

Your ceremony. Thoughtfully preserved.

Whether loved ones are joining from afar or you want to revisit an important moment, TDWC Event Media provides discreet, professionally operated ceremony recording and livestreaming.

CHOOSE THE COVERAGE THAT SUITS YOUR CEREMONY

LIVESTREAMING | Broadcast the ceremony to guests who cannot attend in person, using an agreed online platform.

RECORDING | Capture your ceremony for viewing and sharing afterwards.

COMBINED | Livestream the ceremony and receive an independently captured local recording, where technically practical.

WHAT OUR CEREMONY SERVICE INCLUDES

A pre-agreed service window of up to two hours, with up to 30 minutes for setup beforehand and 30 minutes for pack-down afterwards. A professional single-operator setup, generally using fixed-position or limited-movement camera coverage. An agreed audio connection and practical backup measures wherever available.

YOUR FINISHED RECORDING

Recording and combined packages include a straightforward Ceremony Finish Edit: beginning and end trims; removal of setup footage; basic sound-level, exposure and colour adjustments where needed; simple titles; small uncomplicated cuts; and one reasonable round of minor corrections. Standard recording is Full HD 1080p. Optional 4K local recording may be arranged in advance, subject to your venue package and technical suitability.

IMPORTANT DISTINCTION

This is ceremony documentation, not cinematic wedding videography. It does not include bridal preparations, roaming footage, photography, highlight films or reception coverage unless separately agreed.

What to expect on the day

A QUIET, CONSIDERATE PRESENCE

We coordinate with the venue and ceremony celebrant or officiant on appropriate camera placement and equipment access. Our aim is to document the event without interrupting it. Some ceremony locations restrict where cameras can be positioned, and guests or decorations may occasionally obstruct the view.

AUDIO, CONNECTIVITY AND VIEWING

Clear speech is a priority. The venue or organiser must arrange a suitable microphone/audio feed and competent operation of the sound system where required. Livestreaming depends on the agreed platform, internet connection, permissions and third-party systems. Internet or platform interruptions can occur; where practical, a separate local recording continues. Audio, lighting and unobstructed sightlines cannot be guaranteed in all conditions.

BEFORE YOUR CEREMONY

Please provide the venue with the ceremony date, start time, running order, celebrant/officiant details, any access restrictions, planned music or readings, and any specific accessibility or viewing needs. Confirm the livestream platform and sharing/privacy settings in advance. The organiser is responsible for necessary permissions and attendee notifications, including rights to livestream music and other material.

DELIVERY AND PRIVACY

Recordings are usually delivered electronically within seven calendar days for unedited material; the included ceremony edit timetable will be confirmed with your booking. Please download and retain your own copy promptly. Files are normally retained by TDWC for 30 days after successful delivery. We do not use identifiable footage for promotion without permission.

BOOKING, PRICING AND SERVICE CONDITIONS

Your wedding or ceremony venue will provide your complete package price, payment information and booking conditions. Any extensions, specialist equipment, extra coverage or changes must be quoted and agreed beforehand. Your venue will explain who is responsible for your booking and refunds. Service details and technical limitations are confirmed in your booking documentation; your rights under Australian Consumer Law remain unaffected.
